

Who we are.
What we do.

Complete solutions provider for generator packages, combined heat and power (CHP) systems, microgrids, and anaerobic digesters, and RNG upgraders.

Our company has the capacity to supply and service the full range of power generation products, including generator sets, switchgear, gas handling skids, waste heat recovery systems, absorption chilling systems, carbon credit monitoring systems, and much more.

In-house electrical and mechanical engineering solutions

Our experience covers a wide variety of applications: greenhouses, hospitals, universities, landfills, waste water treatment plants, agricultural establishments, mining operations, oil fields, and beyond.

Energy Independence.

Generating Reliable, Clean Energy.

Why Martin?

We have installed hundreds of CHP units throughout the United States, Canada, Central and South America, Africa, Europe, Asia, the Middle East, and Australia.

Our commitment to customer satisfaction is second-to-none. We evaluate each project and engineer solutions that exceed your expectations.

We can install our custom, sound-attenuated enclosures in sub-basements and on roofs.

Professional manufacturing, careful assembly, and comprehensive testing are performed by trained technicians, in our own facilities.

Martin Energy Group excels in providing custom solutions for our clients' complex energy needs.

Our STORY

Martin Energy Group has been a power solutions provider for over forty years. Our company has its roots in Lancaster County PA, sharing the values of integrity and solid business principles with the surrounding community.

1976

Company founded in Lancaster County, PA, with focus on diesel units for prime and standby power

1980s

Experience in anaerobic digesters, Office opened in Latham Missouri, Gas scrubbing solutions offered

1990s

Diesel and natural gas units being shipped globally (Russia, Chile, Venezuela, Paraguay, Egypt, Nigeria), Electrical engineering team is organized for switchgear, Heat recovery skids and modular CHP units are being designed and shipped

2000s

Biological gas scrubber developed and successfully implemented

2010s

Martin Construction Resource is added to the Martin group of companies, offering anaerobic digester design and construction services

2020s

RNG (Renewable Natural Gas) product line is developed, Martin offers new financing options such as a PPA (Power Purchase Agreement)

Through Martin Construction Resource LLC, we offer anaerobic digester solutions, including consultation, engineering, procurement, and construction. Our digesters are built with proven technology and backed by thirty years of experience and hundreds of successful biogas projects worldwide.

We provide you with turnkey general contracting services to carry out all construction and subcontracting for your project.

Project services also include startup, digester operations, troubleshooting, training, and warranty support.

International Experience:

Armenia, Australia, Belize, Bulgaria, Canada, Chile, China, Colombia, Costa Rica, Ecuador, El Salvador, Estonia, Greece, Ireland, Italy, Japan, Korea, Mexico, Mongolia, the Philippines, Poland, South Africa, Spain, Ukraine, Taiwan and Uruguay.

Our first overseas installation was in Japan in 1986. Between 2002 and 2005, MCR installed five covered lagoon digesters in Chile for the handling of swine manure and for carbon credits. Since then, MCR has provided engineering, procurement, and construction services for farms in Ecuador, Mexico, and Australia. We have designed and built over one hundred successful agricultural digesters. Today, MCR routinely provides round, mixed-tank and covered-lagoon digester designs for biogas production from farm and/or food waste.

SERVICES

- Engineering
- Design
- Construction
- Training
- Remote Monitoring

PRODUCTS

- Biogas Flares
- Digester Pumps
- Water Separator Systems
- Gas Scrubbers
- Controls

APPLICATIONS

- Waste Water Treatment Plants
- Dairies
- Landfills
- Packaging Facilities
- and more...

Craftsmanship
